[In accordance with the criteria of Regulation No 1907/2006 (REACH) as amended]

Section 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name: ZINC ORIGINAL – TYPE Z1, Z2, Z3
Chemical name: zinc
CAS number: 7440-66-6
Registration number: 01-2119467174-37-0036

1.2. Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses:
- Zinc metal production RLE.
- Zinc metal production ISF.
- Storage of ingots-slabs in warehouses.
- Production of chemicals (pyro).
- Production of chemicals (hydro).
- Additive for production of inorganic catalysts.
- Melting, alloying and casting.
- Cathodic protection - sacrificial anodes.
- Downstream use of zinc-based sacrificial anodes.
- Extraction of PM (Parkes process).
- Zinc casting / granules, pellets, prills.
- Zinc sheet casting and rolling.
- Wire and rods manufacturing.
- Downstream use of Zn based wire for metal spraying.
- Component for soldering/brazing/welding products.
- Downstream use of zinc based brazing/soldering products.
- Strips and coins manufacturing.
- Batteries ballots, cans manufacturing.
- Zinc (pure or alloyed) powder manufacturing.
- Passivated zinc powder manufacturing (pure or alloyed).
- Use of active powders for batteries.
- Use of zinc powders, pure or slightly alloyed, for formulation of paints, coatings, and inks.
- Use of zinc powder based paints, coatings and inks
- Use of zinc powder for mechanical plating.
- Use of zinc powder as reducing reagent.
- Use of (alloyed) Zn powder as corrosion inhibitor for lubricants.
- Use of zinc powder (pure or alloyed) in the manufacture of diamond tools.
- Use of zinc powder (pure or alloyed) in the manufacture of friction lining.
- Use of zinc powder (pure or alloyed) in the manufacture of carbon brushes.
- Brass manufacturing.
- Use of brass casts for transformation into semi-products.
- Use of brass containing products.
- Die-casting alloys manufacturing.
- Use of die-casting ingots.
- Manufacturing of zinc containing Al-alloys.
- Use of zinc containing Al alloys.
- General hot dip galvanizing.
- Continuous hot dip galvanizing.
- Electroplating.
- Production of targets by (EB) PVD or other sputtering techniques.
- Use of galvanized goods.

Uses advised against: Not determined.
1.3. Details of the supplier of the safety data sheet
Manufacturer: Zakłady Górniczo-Hutnicze „Bolesław” Spółka Akcyjna
Address: ul. Kolejowa 37, 32-332 Bukowno, Poland
Telephone/Fax number: +48 32 295 51 00/+48 32 295 50 00
E-mail address for a competent person responsible for sds: biuro@theta-doradztwo.pl

1.4. Emergency telephone number
112, Factory dispatcher: +48 32 296 55 80 (on call 24h)

Section 2: Hazards identification

2.1. Classification of the substance or mixture
Substance is not classified as hazardous for a human health and life nor for the environment.

2.2. Label elements
Hazard symbols and signal words
None.
Hazard statements
None.
Precautionary statements
None.

2.3. Other hazards
Substance does not meet the PBT or vPvB criteria in accordance with the Annex XIII of the REACH Regulation.

Section 3: Composition/information on ingredients

3.1. Substances
Chemical name: zinc
Synonyms: electrolytic zinc, SHG zinc, zinc metallic, zinc, high purity zinc, electrolytic zinc SHG, zinc special high grade, zinc technically pure
Impurities present 0,005% max.
Range: 99,995%
CAS number: 7440-66-6
EINECS number: 231-175-3
Registration number: 01-2119467174-37-0036

Section 4: First aid measures

4.1. Description of first aid measures
Skin contact: wash out skin with plenty of water with soap. If irritation appears, consult a doctor.
Eye contact: immediately wash out with plenty of water with the eyelid hold wide open, for 10-15 min. Remove any contact lenses. Obtain medical attention if necessary.
Ingestion: exposure in this way usually does not occur.
Inhalation: exposure in this way usually does not occur.

4.2. Most important symptoms and effects, both acute and delayed
As a result of direct contact with metallic zinc (supplied in the form of slabs, ingots, jumbo blocks) adverse health effects were no observed. Possible adverse reactions in contact with skin, eyes or inhalation of zinc compounds, or the processed product in the course of processing.
4.3. **Indication of any immediate medical attention and special treatment needed**

Physician makes a decision regarding further medical treatment after thoroughly examination of the injured. Symptomatic treatment.

### Section 5: Firefighting measures

5.1. **Extinguishing media**

*Suitable extinguishing media:* metallic zinc is not flammable. Use extinguishing measures that are appropriate to the environment.

*Unsuitable extinguishing media:* water jet – risk of the propagation of the flame.

5.2. **Special hazards arising from the substance or mixture**

May produce toxic fumes of zinc and zinc oxides if burning. Do not inhale combustion products – it can be dangerous for health.

5.3. **Advice for firefighters**

Personal protection typical in case of fire. Do not stay in the fire zone without self-contained breathing apparatus and protective clothing resistant to chemicals. Collect used extinguishing agents.

### Section 6: Accidental release measures

6.1. **Personal precautions, protective equipment and emergency procedures**

Limit the access for the outsiders into the breakdown area, until the suitable cleaning operations are completed. In case of release of large amounts, it is necessary to take appropriate steps to prevent it from spreading into the environment. Use appropriate personal protective equipment.

6.2. **Environmental precautions**

In case of release of large amounts of the substance, it is necessary to take appropriate steps to prevent it from spreading into the environment. Do not let the substance to get through the surface or ground water, soil, sewage system, wells, basements etc.

6.3. **Methods and material for containment and cleaning up**

Pick it up mechanically. Material treat like a waste or reuse it.

6.4. **Reference to other sections**

Appropriate conduct with waste product – section 13.

Appropriate personal protective equipment – section 8.

### Section 7: Handling and storage

7.1. **Precautions for safe handling**

Handle in accordance with good occupational hygiene and safety practices. Ensure adequate ventilation. Before break and after work wash carefully hands. Use appropriate personal protective equipment.

7.2. **Conditions for safe storage, including any incompatibilities**

Keep only in a cool, dry and well-ventilated place. Protect against fire sources, heat, water and moisture. Protect from water and moisture. Keep away from inorganic acids and bases.

7.3. **Specific end use(s)**

Every relevant identified use is given in subsection 1.2.

Particular identified end uses of zinc metallic include different type of industry:

- in zinc industry to production slabs, ingots, blocks, alloys, die-casts, ball electrodes, zinc dust.
- in metal industry used as anticorrosive and decorative coats.
- in chemical industry used as Chinese white, to rubber production.
- in pharmaceutical-cosmetic industry in the form of zinc oxide as filling.
Section 8: Exposure controls/personal protection

8.1. Control parameters

For substance are not defined occupational exposure limit values at working place in European Union. Please check any national occupational exposure limit values in your country.

8.2. Exposure controls

Use the product in accordance with good occupational hygiene and safety practices. When handleings do not eat, drink or smoke. Before break and after work carefully wash hands. Ensure adequate generally ventilation and/or locally.

Hand and body protection

Normally not required.

Eye/face protection

Normally not required.

Respiratory protection

Normally not required.

The information relating to personal protective equipment for the case of contact with zinc metallic, in the form of ingots, wafers, jumbo block, which does not pose a direct threat to their health. The use of plant protection (gloves, protective clothing or masks) is necessary in the case of contact with emerging opportunities in industrial processes zinc compounds, the product being processed or during processing. You should also take into account the possibility of mechanical or thermal hazards during the processing of zinc metal. Selection of PPE should be based on the use of substances.

The material that the gloves are made of must be impenetrable and resistant to the product's effects. The selection of material must be performed with consideration of breakthrough time, penetration speed and degradation. Moreover, the selection of proper gloves depends not only on the material, but also on other quality features and changes depending on the manufacturer. The producer should provide detailed information regarding the exact breakthrough time. This information should be followed.

Applied personal protective equipment must comply with the requirements of the Regulation 2016/425/EU. The employer is obliged to provide protective equipment relevant to performed activities and in accordance with all quality requirements, including its maintenance and cleaning.
Environmental exposure controls
Do not allow the substance to contaminate surface water/ground water. Any emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation.

Section 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

9.2. Other information

No additional data.

Section 10: Stability and reactivity

10.1. Reactivity
Substance is reactive. Does not undergo polymerization.

10.2. Chemical stability
The product is stable under normal conditions.

10.3. Possibility of hazardous reactions
Not known.

10.4. Conditions to avoid
Zinc exposed to prolonged exposure to air can undergo passivation.

10.5. Incompatible materials
Acids, bases.

10.6. Hazardous decomposition products
Not known.
Section 11: Toxicological information

11.1. Information on toxicological effects
As a result of direct contact with metallic zinc (supplied in the form of slabs, ingots, jumbo blocks) adverse health effects were not observed. Possible adverse reactions in contact with skin, eyes or inhalation of zinc compounds, or the processed product in the course of processing.

Acute toxicity
LD₅₀ (rat, oral) > 2000 mg/kg
LC₅₀ (rat, inhalation) > 5,41 mg/m³
Based on available data, the classification criteria are not met.

Skin corrosion/irritation
Based on available data, the classification criteria are not met.

Serious eye damage/irritation
Based on available data, the classification criteria are not met.

Respiratory or skin sensitisation
Based on available data, the classification criteria are not met.

Germ cell mutagenicity
Based on available data, the classification criteria are not met.

Carcinogenicity
Based on available data, the classification criteria are not met.

Reproductive toxicity
Based on available data, the classification criteria are not met.

STOT - single exposure
Based on available data, the classification criteria are not met.

STOT - repeated exposure
Based on available data, the classification criteria are not met.

Aspiration hazard
Based on available data, the classification criteria are not met.

Section 12: Ecological information

12.1. Toxicity
Substance is not classified as hazardous for the environment. As the mineral is widespread in the earth’s crust.

12.2. Persistence and degradability
Not determined for inorganic substances.

12.3. Bioaccumulative potential
It shows no potential for bioaccumulation.

12.4. Mobility in soil
This product is not mobile in soil and does not dissolve and does not spread in the aquatic environment.

12.5. Results of PBT and vPvB assessment
Substance does not meet the PBT or vPvB criteria.

12.6. Other adverse effects
This product has no influence on the global warming or the ozone layer depletion.

Section 13: Disposal considerations

13.1. Waste treatment methods
Disposal methods for the product: disposed of in accordance with applicable regulations. Do not remove with household waste. Residues stored in their original containers. Recycle or re-processed.
Disposal methods for used packing: metallic zinc does not have individual packages.

Section 14: Transport information

14.1. UN number
Not applicable, product is not classified as hazardous for transport.

14.2. UN proper shipping name
Not applicable.

14.3. Transport hazard class(es)
Not applicable.

14.4. Packing group
Not applicable.

14.5. Environmental hazards
Not applicable.

14.6. Special precautions for user
They are not required but is recommended for the transport of zinc using roofed vehicles.

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code
Not applicable.

Section 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

15.2. Chemical safety assessment
Chemical Safety Report has been prepared for identified use of substance.
Section 16: Other information

Clarification of aberrations and acronyms

PBT Persistent, Bioaccumulative and Toxic substance
vPvB very Persistent, very Bioaccumulative substance
PNEC Predicted no effect concentration
DNEL Derived no-effect level

Trainings
Before commencing working with the product, the user should learn the Health & Safety regulations, regarding handling chemicals, and in particular, undergo a proper workplace training.

Key literature references and sources of data
This sheet was prepared on the basis of manufacturer’s data, literature data, online databases, our knowledge and experience, taking into account the current legislation.

Other data
Date of update: 26.02.2019
Version: 5.0/EN
Changes: sections: 1-16
Safety Data Sheet made by: „THETA“ Doradztwo Techniczne

This SDS annuls and replaces all previous versions

The information above is based on a current available data concerning the product, but also on the experience and knowledge in this field of the producer. They are neither a quality description of the product nor a guarantee of particular features. They are to be treated as aid to safety in transport, storage and usage of the product. That does not free the user from the responsibility of improper usage of the information above and also of improper compliance with the law norms in the field.
